

Benefits of Qi-Technology:

- Proven effectiveness¹
- Modern technology such as WLAN, cell communications & Bluetooth can be used with ease
- German technology & production
- Electricity-free use
- Easy use
- Free regeneration
- 30 day money back guarantee
- Every year, more than 2.500 customers worldwide trust Waveguard with their EMF protection

¹Read about the studies on the effectiveness of Qi devices at: <https://waveguard.com/en/studies/>

Qi-Devices – Quality made in Germany

The first-class materials for our products come from regional and national companies. A precision machine cuts the housing from the wood. All the parts are assembled by hand and checked for their effectiveness. This is why we can guarantee high quality and functionality.

Waveguard -
Your certified protection
against Electrosmog

Waveguard

Human beings and the environment are always in direct frequency exchange. Every body needs natural waves to stay in balance. It is the unnatural frequencies, on the other hand, that disturb this harmony, which can be the cause of headaches, fatigue or sleep problems.

More exercise and a balanced diet create a good foundation for balance. Relaxation and mindfulness techniques as well as the reduction of electromagnetic radiation can further promote your energy, concentration and relaxation.

Are you looking for more resonance in your life? Then you've come to the right place. We can advise you on the alternative solutions that are right for you.

Qi-Technology

Over the years dedicated to research, we have developed Qi-technology, which works with natural light frequencies, and can therefore provide additional support in all of your measures. You can also use modern, digital communication technology with our technology with ease.

* The specified radii of effectiveness are estimates. These arise from the potential of the Qi-Liquid.

Mobile EMF Protection

Qi-Me – the handy companion

The Qi-Me is the perfect companion when on the go. The handy device fits in your pocket and can protect you sufficiently against unnatural electromagnetic radiation when you are out and about.

- Gold alloy stainless steel cover plate and olive, walnut, maple or swiss pine wood
- Dimensions: 7 cm x 10 cm x 2.5 cm
- Weight: approx. 350 g
- Effective radius: 1 m*
- Mobile use
- EMF protection: high frequency

Qi-Shield – the revolutionary Allrounder

Our Qi-Shield can be used both as a stationary and mobile solution and actively protects against electrosmog, including the current generation of telecommunications technology.

- Original copper sleeve, nickel-plated or gold-plated and oiled walnut wood
- Dimensions: d = 8 cm, h = 16 cm; copper sleeve: 7 cm, 2 mm wall
- Weight: approx. 825 g
- Effective radius: stationary approx. 2,5 m*, mobile approx. 1,5 m*
- Mobile use
- EMF protection: high frequency
- 5G-optimized
- Frost-proof

Clothing EMF Protection

Pro-Cap – the stylish guardian

The Pro-Cap protects the particularly sensitive upper head area not only from harmful solar radiation, but also from electrosmog.

- Cotton & ultra-thin knitted fabric made from silver fibers
- White, gray and black with blue embroidered Waveguard logo
- Solar and EMF protection available

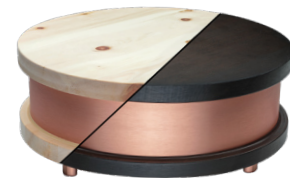

Basic & Premium EMF Protection

Qi-Home Cell – the domestic protection sphere

A unique product specially developed for indoor use. Protect your own four walls without expensive renovations. Thanks to its effective radius, it optimally covers an apartment or a single-family house.

- Copper ring and swiss pine or beech wood with non-toxic hard wax oil refined
- Dimensions approx.: d = 39 cm, h = 12 cm
- Weight: approx. 8 kg
- Effective radius: approx. 7,5 m*
- No mobile use
- EMF protection: high frequency
- 5G-optimized
- Frost-proof

Qi-Max – your best colleague

The Qi-Max has a more extended radius of action than the smaller Qi-Home Cell, offering optimal EMF protection for a large living or working space.

- Copper ring and swiss pine or beech wood with non-toxic hard wax oil refined
- Dimensions approx.: d = 60 cm, h = 18 cm
- Weight: approx. 20 kg
- Effective radius: approx. 50 m*
- No mobile use
- EMF protection: high frequency
- 5G-optimized
- Frost-proof
